

Climb FOR A CURE

ANNAPURNA 2023

“CML is predicted to become the most prevalent leukaemia by 2040 when there are projected to be over 3 million patients worldwide. A concerted global effort working towards a cure is imperative. The iCMLf is uniquely positioned to drive this effort.”

- Professor Tim Hughes,
iCMLf Chairman

**Be part of the iCMLf's
Annapurna challenge in 2023 and play
an integral role in getting us closer to a
cure for CML.**

**Show your support at the highest it's ever been! Over
13,000 feet, at Annapurna Base Camp!**

- ★ Over 20 researchers, patients and supporters from Africa, Australia, Europe, South America, USA climb to meet the challenge.
- ★ With your help we can reach our goal, Annapurna can be climbed and CML can be cured.

How can you get involved?

The International CML Foundation invites you to support our Climb For a Cure: Annapurna 2023 and our work to cure CML. We would be delighted to recognise your support as we climb:
