

## Emerging Regions Support and Partnership Clinical Preceptorship Program

A uniquely tailored education program to help you with the challenges you face as a CML clinician in an emerging region.

### SELECTION CRITERIA

The iCMLf seeks to improve the resources and knowledge of physicians treating patients with CML in emerging economic regions.

The iCMLf will select hematologists for the program whose attendance is expected to provide most benefit in this CML community.

Candidates should have a special interest in CML management and be able to demonstrate their ability to apply and disseminate the knowledge gained from the program to their colleagues.

### APPLICATION PROCESS

To apply for the program, please complete the application form found at [www.cml-foundation.org](http://www.cml-foundation.org) or by emailing [arlene@cml-foundation.org](mailto:arlene@cml-foundation.org).

### Applications close on 15 December

Applications received after this date will be reviewed if additional preceptorship places become available.

Once selected, applicants will be matched with the most appropriate host site according to location, timing, language spoken and other individual needs.

Specific requirements such as visas, insurance and work permits will be determined during the individual application process.

If you have any queries about the iCMLf Clinical Preceptorship Program, please contact Arlene Harriss-Buchan, Program Coordinator [arlene@cml-foundation.org](mailto:arlene@cml-foundation.org)

A UNIQUELY TAILORED EDUCATION PROGRAM TO HELP YOU WITH THE CHALLENGES YOU FACE AS A CML CLINICIAN IN AN EMERGING REGION

CLINICAL PRECEPTORSHIP PROGRAM CONTENT

This unique opportunity would see you undertake a 3-4 week intensive education program at a global CML centre of excellence under the leadership of some of the world's most experienced hematologists. As a part of the clinical team at your host site you may participate in:

- Out-patient clinics
- Hematology ward rounds
- Seminars
- Discussion forums
- Laboratory work

The program would be tailored to your needs, with consideration to your level of experience, along with the challenges and the resources available to you at your institution.

This can include:

- therapies to treat CML; efficacy, toxicity and the management of side effects
- monitoring guidelines
- management of resistance
- role of allograft in CML
- developments in novel therapies, vaccines and drug cessation

The preceptorships are designed as an interactive process with participants steering their own education throughout the program. Upon your return home, and armed with a solid understanding of the most up to date protocols and guidelines to treat CML, you would have considerable information to share with your colleagues. Through the establishment of networks and contacts, the benefits can continue well into the future.

The Clinical Preceptorship Program is offered at a number of CML centres of excellence in multiple languages, including

**01 Professor Jane Apperley**  
*Hammersmith Hospital*  
London, UK
